

Vacancy title: Maintenance Technician, Tyregenics Ltd.

Job Description:

Tyregenics is a new company with substantial blue chip backing that is developing a material recovery plant in South Wales. The plant uses cryogenic technology to freeze chipped tyres and produce high quality rubber powder products.

We need an enthusiastic and proactive Maintenance Technician to support the shift teams running our plant, supporting production processes for breakdowns.

To be available on call as required to support issues and breakdowns.
To maintain the spare parts stores.

Key Qualifications and Experience.

Ability to motivate self, and work independently following established procedures.

A positive approach to learning and applying new skills.

HNC/HND in an engineering discipline

Computer literate.

Willingness to work out of hours (on overtime) and be available on call for breakdowns.

Previous experience of operating forklift trucks and/or front loaders would be an advantage.

A full Job Description will be made available to applicants.

Job Location: Port Talbot, South Wales.

Salarie: competitive, depending on experience and qualifications.
